hazy  
just because sometimes you make me crazy  
just because sometimes you let me know  
I don't  
maybe  
today will show me the something that will phase me  
something that will move me besides dreams  
it seems  
seems like  
lately  
everything I see and hear makes me angry  
even what I say and do myself  
what else can I say I'm still waiting for this moment to  
be gone  
million mile seconds  
a million thousand one  
high and wondering why so loud and bright  
I ain't got no idea what the hell is going on
