in the morning feeling halfright if it was more than just
1 day in the morning i'd feel alright today is flat
beneath the weight of next day, next day, next day,
next day feeling halfright ignore my condition just an
isolated incident in the morning appearing normal
feeling halfright another isolated incident what it will
do to get through the hell of the night when my mind's
uncertain my body decides well my eyes can't wait til
they finally see through you when I get this feeling like
I'm gonna start I just have to stop as I trip on the ocean
that leads through your eyes
