before I get myself unwound clearcut faith come
around docility is tempting bait you settle with a
different god tiny thoughts hundreth start no other way
to come to terms no need to learn I'm hoping for a
change of heart barely shown I'll never let you in my
head a president I call my own I'm hoping for a change
of hope til I spent some time with you shameful dread
doesn't float thought that everything I do has no weight
doesn't float has no weight doesn't float Gonna see
this through has no weight lucky you
