if there's a word for you it doesn't mean anything I've  
got some words for you you cold called everybody they  
don't offer anything but you haven't sold a thing a bad  
idea gone funny a pinch felt in a dream you thought of  
everything but some things can't be thought you  
thought of everything but one thing you forgot is you're  
wrong and you better not be angry and you better not  
be sad you better just enjoy the luxury of sympathy if  
that's a luxury you have and you know no private bad in  
a world time was killing in the sun you know that that's  
the meaning of you're done in a world that's not so bad  
in a world that's not so bad in a world time was killing in  
the sun in the sun in the sun you took all that moment  
and you left it in the sun now it's gone because you left  
it in the sun didn't mean no harm now it's burnt  
because you left it in the sun was a brave idea but how  
could you have known was a great mistake the  
temperature, the distance of the sun
