All along there is love we need
All you are we have ???
You have lost all sense of touch
In the dark without a crutch
You've arrived at the Mountains of Madness

Time has come, you're standing all alone
Plastic god, listen to the drone
Synthesized electric sound
Trembling from underground
You've arrived at the Mountains of Madness

Don't believe that it's a game
Games like this, my friend, will make you go insane
Listen to the sounds, hear them all around
Listen to the sounds, hear them all around

Standing there
Eyes on fire

Standing there, wind blowing through your hair
Eyes on fire, colour everywhere
When you gaze into the sky
All alone with no disguise
You've survived at the Mountains of Madness
You've survived at the Mountains of Madness
