

## Hugh Blumenfeld "Sparrowhawk"

Visit "[Sparrowhawk](#)" on [MotoLyrics.com](https://MotoLyrics.com)

The hawk and the sparrow flew up together  
Though the sparrow was small and the hawk on a  
tether  
Wingtip wingtip, feather to feather  
All in the fall with winter coming on  
All in the fall with winter coming on  
He was dark as a blanket of snow  
She was bright as the lightning's shadow  
He shook yes, she nodded no  
All in the fall with winter coming on  
All in the fall with winter coming on  
The leaves fell down and the wind blew stiff  
They had their tumble and they had their tiff  
And they both sang a love song that started with "If..."  
All in the fall with winter coming on

All in the fall with winter coming on  
It was breasts and hands and flanks and thighs  
Everyone around had to shield their eyes  
And we called in the cops at the sound of their cries  
All in the fall with winter coming on  
All in the fall with winter coming on  
And the sun and the moon hung there in the sky  
Till no one could tell day from night  
And the harvest piled up higher than high  
All in the fall with winter coming on  
All in the fall with winter coming on
