I said, turn your body down
I said, turn your body down

Turn it up for me when we're all alone
Turn it down for me when you have to go far away from
home
Don't want nobody else inside your secret door
Don't want nobody else to find out what I'm waiting for

No matter how far overland or across the sea
You telegraph your body and your love to me
The signals loud and clear, I know what I hear
I know what I hear, I hear you turning up for me

I said, turn your body down
I said, turn your body down

Turn it up for me in the middle of the night
I'll be thinking of you all the time and savoring another
bite
I know the secrets safe, it's just with you and me
I know the combinations here upon my lips, just kiss
and see

No matter how far overland or across the sea
You telegraph your body and your love to me
The signals loud and clear, I know what I hear
I know what I hear, I hear you turning up for me

I said, turn your body down
I said, turn your body down

I said, turn your body down
I said, turn your body down

I said, turn your body down
I said, turn your body down

I said, turn your body down
I said, turn your body down
