Electrified and lit up by an outline of herself
And smiling now as only she can be
She said, "I made some new connections to astound
them all
In ways we've never dreamed about"

Her lovely hand is glowing from a light inside itself
From soaking in the esters stacked for miles on a
single shelf
Holding my eyes still
So she can see all the super-undercover custom
hybrids got to me

It's too much, you're too late, I want to see it all again
She says, "Keep this benzene ring around your finger
And think of me when everything you wanted starts to
end"

And I saw living lusters form in pools beneath her feet
Invertebrates that only she can see
And I said, "What on Earth are all these ampules for?"
She says exactly, "We're not gonna wait around here
anymore"

Systems back down slow, watch the dust cloud we send
And I will keep you, I will keep you to the end
Set your head back low, watch my ears ring
I will take care of you, I will take care of everything

Systems back down slow, watch the dust cloud we send
And I will keep you, I will keep you to the end
Set your head back low, watch my ears ring
I will take care of you, I will take care of everything

It's too much you're too late
Too much you're too late
Piloting my head spins to the ground
And I think, I see myself again
Through the pinhole

But the pinhole captures all of you
And the pinhole captures all of you

And the pinhole captures all of you
And the pinhole captures all of you
And the pinhole captures all of you

Too much, you're too late
Too much, you're too late
Too much, you're too late
Too much, you're too late
