When you are born  
Games start to play  
And all the doors are open  
You choose the one right door  
But close the others

Think with your head  
Play wit your heart  
Some day you will know why  
But now is still so early  
For you to see the light

In your heart you feel the pain  
Feel the sorrow and the shame  
Feel the raing and the sun  
Good weather doesn't always come

Chorus:

It will come soon your last days  
Come soon you can't runaway  
It's faster faster every day  
For me for you there's no other way
