

Bumblefoot

"Normal"

Visit "[Normal](#)" on MotoLyrics.com

I just got new medication
After years of hibernation
I can walk outside for the first time
And let the sunshine touch my hand

I never went in or without
New, late from the inside out
Now everything is fine for the first time
I fit in like I'm one again

(Uh Huh)

(Chorus)
I try but can't explain it
I said too much...
I feel so liberated
It feels like blood...
It's so nice to be normal, to be normal for a change

I used to stare up at the sky
Washin' in warm in my eye
Now all I wanna do is look at you
And fill your darkest room with light

(Uh Huh)

(Chorus)
I try but can't explain it
I said too much...
I feel so liberated
It feels like blood...
It's so nice to be normal, to be normal for a change

(Aah Huuh Uhh Uh)

Yeah it's so nice to be normal, but it still feels kinda
strange

The voice has left my head
The voice inside is dead...
Now I don't hear a sound....

And now every sound can be so loud

(Chorus)

I try but can't explain it

I said too much...

I feel so liberated

It feels like blood...

It's so nice to be normal, to be normal for a change

(Aah Huuh Uhh Uh)

Yeah, it's so nice to be normal, to be normal for a
change

(Aah Huuh Uhh Uh)

Oh, it's so nice to be normal, to be normal

(Aah Huuh Uhh Uh)

It's so nice to be normal, but it still feels kinda strange.
