Overpopulation is plaguing us;
6 billion soldiers off to war
Against our environment and ecosystem
And if we reproduce we're sure to win.
Another mouth to feed while so many still aren't fed.
You want to see yourself in your kids you fucking
narcissistic maniac.
If you think your genes are so superior
Why don't you put them to good use in your own life.
Our homocentric ways are killing the biosphere.
Let's see the breeding stop.
Raise your glass to the son I'll never have.
