Man it took so long  
so lets all embrace the hard youve done  
am i out of place?  
to expect some more  
little face to face we need.  
gotta be some one gotta be somewhere  
if youre not in the sky then youre right down there  
trying be the one  
trying to build this life for me

But you ain't always there  
you ain't always there

look around the room  
stick your fork somewhere  
take a call from her  
and ignore my stare  
hey thats not the way good lovers are supposed to eat  
now you leave again and you promise things  
and we had the best time bargaining  
but we know deep down our lives will never meet

because you aint always there x2  
im not where i wanna be  
because you aint always there for me

whyd you take so long x8  
i doubt you'd even care  
because you aint always there  
you aint always there  
and sometimes i get scared  
you aint always there for me x2
