Walk down the street and i see you from my way
I look at you you look at me
But none of words are said (?)
I walk on right by you
But to my surprise
You're comin' up behind me
With four other guys
Go

You said that your the man (?)
And i am just a geek
You gotta lot of problems
You take them out on me
Well you can take my wallet
You can take my shoes
They follow you just wannabes (?)
Just what you trying to prove
Go

You think you're really something
You hit just like your mom
Well if your going to do it better take you best shot
I know it's going to hurt you
Just upside my face and numb (?)
But you won't be the first jock
That put me in the hospital
Go
