My parents think i'm crazy  
Some paranormal seed  
They called the family doctor  
He knows just what i need  
They took me to the hospital  
Said i'm a moral threat  
They figured out which dna  
Would make me function correct

Don't clone me (x4)

I layed down on the table  
They said to breath in deep  
I saw my parents smile at me  
Before i fell asleep  
They finished the procedure  
And no it wasn't cheap  
But now they can pick which one of me  
That they'd prefer to keep
