Searching for my place in this world  
Getting lost over and over again  
Casting lustrous pearls  
Yet you protected my heart  
You never let me stray too far  
You knew I couldn't pull myself out  
By the strength of my arms

Chorus

You've got me right where you want me  
You took me and put me in my place  
You've got me right where you want me  
And I never felt better

All of my words were profane  
The only time I called Your Name I took it in vain  
Yet You heard my cry, even though I lived a lie  
You new that I would be Your servant  
'Til the day that I die

Chorus 3x

You've got me right where you want me  
You've got me right where you want me  
You've got me right where you want me
