If I could see the end
See there all the madness
Would I understand the consequence?
Sweet lies you've designed to hold me
But I'm here willingly

Go ahead and spit your venomous
'Cus waiting for your poison is what's really killing me
Go ahead and spit your venomous
Hear me cry
Suicides are should have wait for you to poison me

Screaming silently
Too afraid to speak
The wail in kind of pain that doesn't bleed
Your beauty destroys me slowly
But still I can't let it go

Go ahead and spit your venomous
'Cus waiting for your poison is what's really killing me

Go ahead and spit your venomous now
Hear me cry
Suicides are should have wait for you to poison me

I'm dying to drinking
Your beautiful disease
Til it's sadly
You take me and break me
You better must pressed
It's taking my last breath

So go ahead and spit your venomous
'Cus waiting for your poison is what's really killing me
Go ahead and spit your venomous now
Hear me cry
Suicides are should have wait for you to poison me
