Your time will come to face the truth
You only live to die... to die through pain
People of earth were only meant to suffer
For a cause of your own state of mind

Wandering right through
You make me puke
You'd prefer? to die

Creating your own path to ruin
To have no clue where you've been

You take the pain
To end your pain

Where will you go to?
Who will you talk to
With nothing left to offer
You know at the end
You will suffer

Life's state of Hell
Burn and suffer
No one will care
What do you do with your life?
