

Buono!

"On Our Own"

Visit "[On Our Own](#)" on MotoLyrics.com

Tell me about the day you traveled to the Sun
And how you lost your way before your trip was done
Somewhere among the stars your head got turned
around
And now the hardest part is learning to come down
Just wave as you roll past my cloud
We're all on our own now

Tell me your story, make me smile for you again
About your glory days, your journey into sin
Tell me about the voice that's calling out to you
And now the hardest choice is where do you fall to
Just wave as you roll past my cloud
We're all on our own now

This is the moment you've waited for
This is your shining
Everything you've been wishing for
This is your shining
And I'm making my own wish now
I'm wishing on your star

We're all on our own now
