Look how you've growned
It's etched in skin and bone
Dressed in make-up and bleached out in the roses
That's hollow and tasteless.
Where spirits make love and pretty corpses hold their
brides.
Do you know i'll never hurt you
So Taste It, Taste It!!!
So, taste it and we'll never be alone,
I'll take the first bite, yeah! I am ghost!
Say goodnight to you. My darling, my darling
Few words can kill, they inspire in your hands!!
The sun... outside, look at these glass shaped walls,
will burn... the flesh, of all these paper dolls.
We won't fall, we'll be together... just the two of us
That's hollow and breathless.
Where spirits made love, I'm lost and lonely through
your eyes
Do you now I'll never hurt you.
So Taste It, Taste It!!!
So, taste it and we'll never be alone, I'll take the first
bite, yeah! I am ghost! Say goodnight to you. My
darling, my darling.
So, take this rose. So, take this rose
Take this rose and break this bottle of aged pills
We will sleep(will sleep) tonight(tonight) and all
through December.
Soon, she'll grow(I'll grow). Angel(angel)
Put me back together again.
Taste It, Taste It!!!!
Sad rose for life 'cause i'm already dead!!!
So, taste it and we'll never be alone, I'll take the first
bite, yeah! I am ghost! Say goodnight to you. My
darling, my darling.
So, taste it and we'll never be alone, I'll take the first
bite, yeah! I am ghost! Say goodnight to you. My
darling, my darling!!
