## **"A Lesson Learned"**

Visit "[A Lesson Learned](#)" on MotoLyrics.com

There's a rise and fall  
There is a change in the atmosphere.  
This has been more complicated than we've imagined  
Write this down in letters  
Send them far from here  
You can count the miles but it won't hide how close  
they feel

Let it go  
The worst is over (Yeah, its over)  
You're moving way to fast. (Yeah, moving way to fast)

Confidence runs through your fingertips  
You've never felt so alive  
Addressed for the occasion  
If gravity takes its toll you will never know what it's like  
to forget him

So stand tall

Let it go  
The worst is over (Yeah, its over)  
You're moving way to fast (Yeah, moving way to fast)  
For all we know the worst is over  
Let it go  
The worst is over (Yeah, its over)  
You're moving way to fast (Yeah, moving way to fast)  
For all we know the worst is over  
Let's put this in the past (Yeah, put this in the past)  
Did you think that this would last?  
This changes everything we know (Let it go)
