On the darkest days  
You told me that you were there  
and that you'd never regret

Keep scout for, for the trees  
They will shift and catch fire  
It'll all come crashing down on you  
No taking back, no listening  
If we can come for with your apologize  
It's too much to make up for

You told me,  
"What are we waiting for?"

On the darkest days  
What can go wrong?  
What can go wrong?  
When the two of us are together  
Never thought it would come down to this

What are we waiting for?  
We had everything that we ever wanted
