You may find out  
If I find the need to mutter  
I will tell you everything  
You may hear me  
If you truly believe it matters  
Then I will tell you everything

So keep close, keep quiet  
And do not speak a word  
And I will tell you everything

And all I know  
Is that your hopes won't help at all  
So waste your days  
Just waste your days with me

Rather hollow and it could echo  
This is the longest hour you will spend on earth  
Near senseless, near motionless  
This is the longest hour you will spend on earth

And all I know  
Is that your hopes won't help at all  
So waste your days  
Just waste your days with me
