I've been puhed an pulled and dragged
Always told where to go.
I've been fed and forced and filled.
They engraved everything I know
Never question their laws or gods.
I'd be shot on site.
I fall in line, give up my mind
And live their fuckin lives

Before i knew it I'm just like them
Before i knew it I'm Fucking dead

And do we really believe that we are even alive?
I'm living and breathing, building my own way
Those things that mean so much don't mean a thing to
me

Look at yourself...You're fucking dead.
