You're living but you've got no soul,
You captivate, but you hold no weight at all,
So watch as I start to smile.
Your dumber than you think you're deep,
You aggravate, but you always stop to speak,
So watch as I start to smile.

After every party I die,
After every party I die.

The mourning breaks us up inside,
Payback, execution killing time,
So watch as I start to smile.
It's something that you think you need,
Trying your best to sleep at cocaine speed,
So watch as I start to smile.

After every party I die,
(I die after every party.)
After every party I die,
(I die after every party.)

You're living but you've got no soul,
You captivate, but you hold no weight at all,
So watch as I start to smile.

Smile. x11

After every party I die,
(I die after every party.)
After every party I die,
(I die after every party.)
After every party I die,
(I die after every party.)
After every party I die,
(I die after every party.)
After every party I die,
(I die after every party.)

I die after every party.
I die after every party.
