[Verse]

An' though on the outside they may look the same  
Inwardly, they're many worlds apart  
Uncertainty a species now divided  
The fear of the unknown  
Walking alone in the dark

[Bridge]

Suddenly they're cast away in silence  
Like a mirror image for the good of us all  
Through all of those years nothing had changed  
[Backing vocals]  
But in this new world there are changes and more

[Chorus]

Go beyond this space [Backing vocals]  
You've gotta walk on through the door  
Find a better place [Backing vocals]  
An' leave the past behind  
Discover ways to change [Backing vocals]  
You've gotta search inside your soul  
Now can you see [Backing vocals]  
There's a new day, a new day dawning  
(There's a new, a new day)

[Verse]

A perfect generation is created  
As one, without suffering or pain  
Technology the father of creation  
What's a child without a name  
In this fatherless world

[Bridge]

Cast away into a new horizon  
Embrace the soul, open your mind  
Through all of those years nothing had changed  
[Backing vocals]  
But in this this new world there are changes and more

[Repeat Chorus]
