Well we've come a long long way,  
Look at everything we know  
We're getting smarter everyday,  
Ah but where's it gonna go  
For all the words that go by,  
I've got a feeling inside  
That after it's all said and done  
Though we've come a long long way  
This old world's not much better than it was  
Oh it's just like the twenties, machine guns were plenty  
Everyday you'd get shot up all the whisky'd get bought  
up  
We'd be dancing the night through, just waiting until  
The joke's on you, ah then what do you do  
Model T's and Chevies just loaded with heavies  
Shining faces like morning roses, aglow with their  
noses  
Pressed on your window, just waiting to shine  
Your concrete shoes, to the piano roll blues  
We're flying space ships round the stars

Getting faster by the hour  
Pretty soon we'll be on Mars  
Build another Ivory tower  
Thru all the praise that you borrow  
There's still hunger and sorrow and after it's all said  
and done  
Though we've come a long long way  
This old world's not much better than it was  
Oh it's just like the twenties, machine guns were plenty  
Everyday you'd get shot up all the whisky'd get bought  
up  
We'd be dancing the night through, just waiting until  
The joke's on you, ah then what do you do  
Oh  
Model T's and Chevies just loaded with heavies  
Shining faces like morning roses, aglow with their  
noses  
Pressed on your window, just waiting to shine  
Your concrete shoes, to the piano roll blues
