Angel...Angel...Angel...
Angel...Angel...

Like an angel...angel...angel...
Like an angel...angel

We had a lot of fun, we made love beneath the sun
Somehow you completed me, life went so easily
I cannot close my eyes, need to cry
I can't forget our sad goodbye
And every night I am asking why
But I know love never dies

Chorus:

Like an angel, you came into my life
And turned it all around
You have changed the way I feel
Like an angel, you were mine for real
(2X)

Each day I see your face (see your face)
Feel your touch and your warm embrace
Memories of you and me, it's all that I can see
I cannot close my eyes, need to cry
I can't forget our sad goodbye
And every night I am asking why
But I know, love never dies

Repeat chorus 4x
