off the coast of argentina  
where no man has ever travelled  
is a dark uncharted island  
where exists a tribe of women  
and they're all beautiful and voluptuous hollywood  
starlets  
and they wear revealing uniforms  
and live inside a temple  
where they have a fiery altar  
and perform sacrifices  
to their blonde seductive idol  
and they pray for men for without them they will vanish  
and they dance dance dance  
but here's this one other problem  
on an otherwise peaceful island  
it's a horrifying monster  
who doesn't have a face  
that the girl cooked up in wardrobe  
and keeps them in constant terror  
he appears to need a virgin to appease him  
then one day in the hidden cove

a navy boat drops anchor  
filled with united states marines  
and they invade the island  
and shoot the awful creature  
and they all live happily after to the bitter end  
and they dance dance dance
