"Over You"

Visit "[Over You](#)" on MotoLyrics.com

There's a fine line between love and hate
That we erased
That we erased
What started as a mask became a face
The pain untraced
The pain untraced

Refrain:

I been a long time searching for you
I been a long time breaking through
I'm gonna be a long time getting
Over you
Over you

Standing in my doorway facing south
The moon comes up the sun goes down
Wondering what this noise was all about
The dust blows in the light blow out

Refrain

Down the road I see the fog roll in
As thick as fear as dark as sin
We live in an age lit by lightning
After the flash we're blind again

Refrain
