Hear me crying, pushing back, lost and lonely & I know
it so very well
Spending hours by the river, walking through the still of
night
Oh was it here that I saw you?
Way downtown there's a promise of something
In the lights on the avenue
As he turned the corner maybe just a step away
There's no mistake when you find it

This time it feels so right, yes I know it, this time I can
be so very sure
Oh yeah, there's something good lasts forever
This time, now she's so down in my mind
Oh this time...Mmm-hmmm...This time...Oh ho, this
time...Mmm-hmm

Well they say love is blind but I tell you
There's one thing that I'm certain of
Someone very special just as night has come my way
And I believe we can make it

This time it feels so right, yes I know it, this time I can
be so very sure

Oh yeah, there's something good lasts forever
This time, now she's so down in my mind
Oh this time...Oh yeah...This time...Mmm-hmmm
This time...Oh oh yeah, yeah we're fine, this time, woo,
mmm-hmm

This time it feels so right, yes I know it
This time now she's so down in my mind, mmm
Oh this time, there's something should last forever
This time, now she's so down in my mind
Oh this time, that something good last forever
This time, now she's so down in my mind
This time, it feels so right, yes I know it, this time...
