Welcome to our world
There are thousands of places
Welcome to our world
There are thousands of faces
How do I get there?
Which way is right?
I don't stray the path
I just ride my bike

I ride in the sun
And I ride in the rain
Don't push so hard
And I don't feel the strain
Don't know where I'm going
So I stick to the path
There is no yesterday
'Cos I never look back
Ask me the future
I don't know what it's like
I don't stray the path
I just ride my bike

I'm swerving through
The street lamps in a row
We've begun our journey
Are you ready let's go?
And in the distance
Yes, I hear your call
But if I pedal too fast
I will probably fall
Ask me the future
I don't know what it's like
I don't stray the path
I just ride my bike

And when this world
Has turned into the sun
We'll still be here
But our bikes will be gone
