You were my girl
We got a good thing
Never thought that things would change
'Coz you would always say 'i'm the only one for you'
everything was straight
the love we made was great
NEver thought id see the day
When you would slip away
and run off with somebody new
i tried to understand what i did wrong to make you
leave
i tried, i did that best that i can
theres no other guy whos gonna love u like i did
Now you know that im doing good
heard the buzz bout me blowing in the hood
You Made a mistake and played the wrong man so

[Chorus]

i wont lose sleep over you
i will not cry over you
i wont save no shit from you
but instead its what ill do
ill date every girl i see
and make sure that you see me
and youll regret that your no longer the one standing
next to me
i wont hate on what you do
when you find somebody new
and youll relize you were a fool
but instead its what ill do
ill shake my head in sutch discrease
and throw my sucess in your face
to move that quick means what you wish
ill make you hate yourself for this

Gonna make you hate yourself
Regret the fact you ever doubted me
On this shot, sometimes i felt like we would never, ever
part
i dont really care anymore
just thinking about the things that you did

you didnt really care
back when i was with that group co-5
you used to act like you was by my side
i trusted i needed you
and all you ever did was mess around with my band
and talk behind my back
damn i really hated that
but see now your gonna pay for that
and live with the fact that we'll never be one again
unless i choose to
bitch ima be cruel to
unless you no that i aint shiting thats just something
you gonna have to learn to get used to

[Chorus]

i wont lose sleep over you
i will not cry over you
i wont save no shit from you
but instead its what ill do
ill date every girl i see
and make sure that you see me
and youll regret that your no longer the one standing
next to me
i wont hate on what you do
when you find somebody new
and youll relize you were a fool
but instead its what ill do
ill shake my head in sutch discrase
and throw my sucess in your face
to move that quick means what you wish
ill make you hate yourself for this
