Hush my baby, baby dry your tears,
The murder is done
There'll be no more victims
No more gas bottles full of nails,
We've put the criminals in jail
No need to cry, No need to fall down,
Stop living in fear, We've got the solution
Call gigi pirate, He's gonna find the problem ,
He's gonna solve the problem

Live your life in deep security,
Our cameras will keep an eye on you,
Intervention troops are ready to go,
And if it's not enough there'll be a curfew.
No need to cry, No need to fall down,
Stop living in fear, We've got the solution

Call gigi pirate, He's gonna find the problem ,
He's gonna solve the problem

I need you to suspect everyone around
And call him if you find something wrong
We'll clean it up, clean it up, in town
And our foreign neighbors will be proud of what we've
done,
Proud of what we've done and if it's not enough

Call gigi pirate,
He's gonna find the problem ,
He's gonna solve the problem.
