Far away from where I came
And nothing makes it hard to stay
Another wave of months and days
From the passenger side, it's a sudden place
And nothing seems that hard
But a real response is harder

I roll in and I roll out
Time passes but I'm no wiser
I roll in and I roll out
But you make the shape of your lifetime

Far away from where I came
Now only you and I remain
Past another lap, another highway
From the passenger side
We waited quietly

I roll in and I roll out
Time passes but I'm no wiser
I roll in and I roll out
But you make the shape of your lifetime
I roll in and I roll out
It's alright, we can't wait to find out
I roll in and I roll out
You make the shape of your lifetime

On the day after tomorrow
We'll make it to the high ground
And pity the morning as it comes around
Maybe tomorrow we'll come in right
And we'll, we'll pity the morning
We'll pity the morning
We'll pity the morning just as

I roll in and I roll out
Time passes but I'm no wiser
I roll in and I roll out
Leave it, all right
