remember when all the birds fell out of the sky  
on that day all the blood froze in my veins  
out of fear the children all put on their masks  
continue on this sheltered path  
we will become  
corpses walking hand and hand into the twilight  
on the wings of your sister you'll find divinity  
this flower doesn't seem to be efficient enough  
perhaps we should destroy it rebuild again  
replace the broken gearbox  
remove it from her chest  
hello mr. nobel.come look, i've saved her life  
that's odd, you've seemed to have lost your face  
i swear i've seen you before  
oh well, you must not be important

just watch it all slip away covered by the oceans  
calming waves  
hidden by the rays on sunshine and the darkness of  
clouds  
and it's funny because as i watch everything grow  
smaller  
i can't seem to remember a time when i would have  
cared  
i can't seem to feel my heart  
this apathy is not intended thank you fair scientist  
thank you for killing me
