Tell me again
exactly how we get ourselves
out of this one

The lifeboats they made
are full of holes and they
swallow most of the ocean

But you hold on

Iceberg ahead - Look away, look away x2

We have a flare
won't somebody save our souls from freezing
We have champagne + hypothermia
But you hold on

Iceberg ahead - Look away, look away x2

My last breath I breathe into you
and all because they said
we could rule the world

I'm lovestruck and it's too late
I'm lovestruck the waters make
my grave

Hold on
hold on to me
