It's not been easy on you, I saw your face  
My rust has broken your skin and now you ache  
I'll leave a star on for you for after dark  
I'll leave the door on the latch to keep the spark

I'll leave my prints on you whenever you need me to  
If I'm just numbers to you then how will I live?

My heart's an open ravine for you to fall in  
while I watch you building bridges and things

I'll leave my prints on you whenever you need me to  
If I'm just numbers to you then how will I live?

I kiss the ground you walk on every day

I'll leave my prints on you whenever you need me to  
If I'm just numbers to you then how will I live?

If I'm just surface stuff then let me sink  
If this is true love, True love  
I will not blink
