I can't believe the way i feel  
just take one look at me  
I'm clowning around but i don't care what people think  
of me

Today my love just fell from the sky  
like peter pan i just wanna fly  
but i have found my girl

She's everthing a girl could be  
my heartbeat slips on by  
Like sugar and spice  
I took her twice she is so heavenly

When she says hi I just wanna die  
When she kisses me I'm blind I could see  
but I have found my girl

Everyone knows I cherish her so  
That I could never do without her  
She promise to me so faithfully  
that the diamond on her finger would come from me

I can't believe the way I feel  
just take one look at me  
I'm clowning around but i don't care what people think  
of me

Today my love just fell from the sky  
like peter pan i just wanna fly  
but i have found my girl

But I have found my girl
