A mushroom cloud in the distance  
Marks the end of your existence  
A matter of seconds to destroy all nations  
The end is here annihilation

Lighting the fuse for spontaneous combustion  
Missiles are launched to bring forth destruction  
Mutated creatures roaming the wasteland  
Kill all survivors dying by their hand

Hundreds of years to recover and rebuild  
Cause everything's wiped out and everyone's been  
killed  
Survive nuclear winter and the holocaust  
Your old life is gone, everything's been lost

[Chorus:]

Nuclear blast, death is fast  
Billions killed, feel the chill  
Total death, in peace you rest  
Obliterate, a world of hate

Go through the desert elude the acid rain  
Mutants embark on their tyrannous reign  
Furious battleground for mutants and humans  
Fight in the wreckage, fight in the ruins
