Gather attack while death march in the sky  
Ride through the heavens with power  
The hammer of battle pound hard from above  
All doomed and damned in death's hour

Armies' formations winged in death's sky  
Storming from the other side  
Apocalypse dawns at the fiery command  
Above the great battle fly

Chaos and fire to deafening sounds  
Nearing from the other side  
Last march for the battling hordes  
Annihilation on the rise

Now proud all watch them by Nordlight we ride  
Warriors with cold blazing eyes  
Speeding on wind the fierce holocaust rises  
Legions of black hold the sky

Hordes of war come storming forth  
Coldblooded warriors of holocaust  
Death stares out from their blinding fearless eyes  
The sign of evil burns inside

Smell of death now as we ride through holocaust  
Burning souls fall from the sky  
Across the tide of pure apocalypse  
Come waving flames to burn you all

Descent from the valley bursting through all  
Released now is the black burning sound  
Those who oppose shall be eternally destroyed
