Endless tall mountain sides  
Gates to open wide  
Lands of dragon birth  
Sorrow always rain

On a frosty path to sorrow  
Guarded by unearthly beasts  
Darkening memories claim  
That winter never dies

Bad moons enshrined  
In the heart  
Northern darkness  
Walk with me hand in hand

At the stormy gates of mist

On a frosty path to sorrow  
Guarded by unearthly beasts

Darkening memories claim  
That winter never dies

With bad moons enshrined in the heart  
Northern Darkness walks  
With me hand in hand

Endless tall mountain sides  
Gates to open wide  
Land of dragon births  
Sorrow always rain

What wait eternity in permafrost  
Views that eyes can never bear  
At the stormy gates of mist  
I'm still standing
