Music: Abbath

Lyrics: Demonaz

Shadowed you fall

Iced soul in the shivering sphere

Bestial sound of wintercall

Bitter cold comes whispering

Noctambulance spread its wings

Snowtombd darkness circling

Demons claws in wind

Everlasting souls on ice

Cast for the nebular worlds

Demons of endless time

In the uplifting aurora borealis of cold

A trinity of might is born

Uphead us masters of demons roar

By glacial uttermess we view your spirits

Windswept forever the northerly hemi-
sphere

Noctambulant

Frozened in the wintergate

Shadowed you fall

Iced soul in the shivering sphere

Bestial sound of wintercall

Bitter cold comes whispering

Noctambulance spread its wings

Rule the everlasting souls on ice

Cast for the nebular worlds

Demons of endless time

In the uplifting aurora borealis of cold

A trinity of might is born

Uphead us masters of demons roar

By glacial uttermess we view your spirits

Windswept forever the northerly hemi-
sphere
