[Music: Abbath; Lyrics: Demonaz]

I stride purposefully through the snow
To the icy vasts at dusk
Crystals swirl by northed dim
Majestic be this winter

Winterdemons winterbeasts
Further my visionary means
Blast into dominance
Milleniums filled with pride

Winters of hate winters of pain
Winters of sorrow
These winters awaits
Nebular fog aurora fog
Await us all in the seasonal cold

I stride purposefully through the snow
To the icy vasts at dusk
Drawn by our will
From the coldest regions
An ice age comes

Minds into the elder dryas
Majestic panorama
Across the lands
Our mark shell flow

Winters of winters of pain
Winters of sorrow
These winters awaits
Nebular fog aurora fog
Await us all in the seasonal cold
