Music: Abbath

Lyrics: Demonaz

I stride puposefully through the snow

To the icy vasts at dusk

Crystals swirl by northed dim

Majestic be this winter

Winterdemons winterbeasts

Further my visionary means

Blast into dominance

Milleniums filled with pride

Winters of hate winters of pain

Winters of sorrow

These winters awaits

Nebular fog aurora fog

Await us all in this seasonal cold

I stride puposefully through the snow

To the icy vasts at dusk

Drawn by our will

From the coldest regions

An ice age comes

Minds into the elder dryas

Majestic panorama

Across the lands

Our mark shall flow

Winters of hate winters of pain

Winters of sorrow

These winters awaits

Nebular fog aurora fog

Await us all in this seasonal cold
