Yea, yea, immortal technique (you know)...Harlem to  
South Africa  
(this is how it goes) for the head warmers, y'know wut I  
mean..this is  
for my peoples..insomniac I can't sleep (it's real son)  
Mic Check. ayo,  
ayo (yea)

Im a rebel that'll fire missles at red dawn  
but before I issue the order to send bombs,  
I want presidential money like execs at n'ron  
and goldiggin porn chicks for me to spend on

But Im'a only pay for 1 night stay at the Ritz  
I wont even get you a towel when I spray on your tits,  
Im not a misogynist I just like it when gurls are  
massagin this so pop shit

And Im'a smoke you and your bitch momz  
Im ambidextrist the microphone cause switch palms  
Immortal Technique phsychotic nigga to spit calm  
misinterpreted by the media like Islaam

I love the underground but not enuough chicks in a  
thong  
what the fuck how could beautiful women be wrong?  
Tech load clips like they were hits from the bong  
that was supposed to be the end of the song  
but its not the freestyle got me stuck in the zone

I cant stop brainwashed commercial hip-hop the  
government plot

But Im'a shoot down the propaganda stuck in your  
brain

like the military did to the fourth terrorist plain  
that was ill but shut the fuck up and let me explain

what good is fame and flossan  
when you stuck in a coffin?  
and who the fuck you gonna run to when i make you an  
orphan?

Im metamorphisizin into somethin you thought that i  
could never be  
ghetto engineered sickness without a remedy  
my heart pumps nitro-glyceran and hennessey twisted  
chemistry

Cry blood and i bleed venom  
never subliminal clear with the message im sending  
bending the space-time continuum

Just to get to you  
and blast you so hard itll kill the person next to you

So in retrospect remember and dont fuckin forget  
yall are walkin dead people yall just dont know it yet!

Yea...yea nigga..its on...you know wut time it is..  
im out...harlem nigga.....this is for all the devils..  
I'm commin in here to take your head off.
