No more heart broken songs, get over it, move on  
Let's wipe those tears away from that pretty face  
That pretty fucking face

No more crying to your dashboard records, you sappy  
emo bitch  
We are all born alone and we all die alone  
Forget about your problems just for one night

No more crying, only death and dying  
Let's wipe those tears away

We are all born into this world alone and we all die  
alone

We are all born into this world alone and we all die  
alone

We are all born into this world alone and we all die  
alone

You're not the only one, everyone has their problems  
So put a smile on that pretty fucking face  
And look ahead to the future

We are all born into this world alone and we all die  
alone

We are all born into this world alone and we all die  
alone

We are all born into this world alone and we all die  
alone
