Tree hugging hippies  
Spoonfed scum  
You worship Che Guevara  
Your politics are sick  
I wage war against your world  
Will you live to see the end?  
Pteromys volans crap  
Blocks the way to progress  
Two step forward  
And three steps back  
I wage war against your world  
Will you live to see the end?  
Downhill since '88  
There is no future for green generation  
How can this country ever develop  
When you are forcing your sickening ideology  
I wage war against your country  
You won't live to see the end!
