

## **Impellitteri "Wasted Earth"**

Visit "[Wasted Earth](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Born in the Age of Technology  
In the year of our Lord 2033  
The Earth has been poisoned and we had to leave  
Now we're all afloat in the stars of the galaxy

Two thousand light years away from the sun  
I'm trapped in a room in this space station  
Tell me the stories, the legends, and tales  
Of Generation Earth and how we prevailed

Generation, Generation Earth will prevail  
Generation, Generation Earth will prevail

There once was a time when our planet Earth was the  
only place to live  
But we destroyed it all by taking all she had to give -  
(wasted Earth)  
And as we ride through the black horizon, I long for the  
days of old  
'Cause I may never set foot on the wasted Earth no  
more - (wasted Earth)

[solo]

There once was a time when our planet Earth was the  
only place to live  
But we destroyed it all by taking all she had to give -  
(wasted Earth)  
And as we ride through the black horizon, I long for the  
days of old  
'Cause I may never set foot on the wasted Earth no  
more - (waste Earth)  
We took from the land all the fuel and power to fly to  
the other side  
We got to find a way to cross the universe again -  
(wasted Earth)
