Why  
Why  
Why ohhh why [repeat 5x]

What is it that I do to get you pissed  
Whenever I call you I get a fit  
You got my number blocked off on your phone  
When I come over they say your not home  
Its killing me not know what went wrong  
And plus we been together too damn long  
It time to figure out something is going on  
Girl are you trying to be all alone

What is the reason for you trippin on me (baby why  
dissin me)  
A week ago you were in love with me (now your actin  
like you just met me)  
Trying to figure out where we went wrong (please,  
please talk to me)  
You hang up every time I call (hanging up on me)

[Chorus]  
Why you keep hanging up the phone in my face  
Girl you know that bothers me stresses me  
Why you keep hanging up the phone  
You got me trying to plot it out  
Seating here wilin out  
Tell me why  
Why you keep hanging up the phone in my face  
Girl you know that bothers me stresses me  
Why you keep hanging up the phone  
You got me trying to plot it out  
Seating here just wilin out  
Tell me why

So, babe now I guess I've been replaced  
Must be another man taking my space  
Cause when I call I feel you frown your face  
For some reason I feel I've been erased  
Honey now slowly peeping game  
Don't take a genius to know you that changed

I just wish that you would stop playin me  
Baby pick up your phone and talk to me

What is the reason for you trippin on me (baby why  
dissin me)  
A week ago you were in love with me (now your actin  
like you just met me)  
Trying to figure out were we went wrong (please,  
please talk to me)  
You hang up every time I call (hanging up on me)

[Chorus]

Why you keep hanging up the phone in my face  
Girl you know that bothers me stresses me  
Why you keep hanging up the phone  
You got me trying to plot it out  
Seating here wiling out  
Tell me why  
Why you keep hanging up the phone in my face  
Girl you know that bothers me stresses me  
Why you keep hanging up the phone  
You got me trying to plot it out  
Seating here just wiling out  
Tell me why
