My face your fear  
I won't compromise  
The final fight -Now we stand eye to eye  
In this moment- I set my hate free  
A violent outbreak against humanity  
This time I'll take revenge for all the lies  
A one man army- living death in disguise  
The last seconds- the fear on your face  
A rush of blood- endless suffering  
In all the past years-I've left behind me  
I was the one you lied to - you have bled my heart  
I lived in desperation because I believed in you  
Until I comprehend your false game- now I despise you  
You won't break me  
Your fear is your detriment  
You were born to suffer
